

Blood Finding Agent

Additional Information to help you locate your game

Spray BlueStar®
on the ground and bushes...

BEFORE ► AFTER

TURN DOUBT INTO SUCCESS

If the fleeing animal has been wounded, BlueStar® will make the slightest blood trace glow a luminescent blue in the dark, even if washed off by the rain. Easy to use after hunting, BlueStar leaves no doubt about the efficacy of your shot.

As soon as darkness has set in, this blood finding agent will help you find the trail of the wounded animal...

The blood is hardly visible with a flashlight, especially if it has been rained upon.... No more doubts about your shot! The slightest trace of blood becomes fluorescent in the dark.

In the dark, BlueStar® will help you confirm your shot and recover an animal as soon as darkness has set in, even if the animal has fled 100 meters or more.

**TURN DOUBT
INTO SUCCESS**

Blue Star®

Blood Finding Agent

**Takes up little space
Practical and effective
Quick preparation**

◀ BlueStar® Hunting Kit

Contains an 250 ml slimline sprayer bottle and 2 pairs of tablets in foil packets. The BlueStar® Hunting Kit allows you to prepare one or two 250 ml doses according to the desired dilution.

BlueStar® Hunting Blister ▶

Contains 4 pairs of tablets wrapped in foil packet. One foil packet of tablets is sufficient to check your shot.

For a search covering a 100 meters distance, use the 4 foil packets diluted in 500 ml of water, or up to 1 liter.

BlueStar® comes in fast dissolvable tablets.

BlueStar® comes in hermetically sealed foil packets that ensure a long shelf life. Each foil packet contains two fast-dissolving tablets that only require water to be ready for use. They are handy, efficient, and they won't load you down. Any kind of water will work: river, pond rain, puddle...

Formulated after a special for mula dedicated to criminal investigation to help search for invisible blood trace evidence on crime scenes, BlueStar® offers the hunter an efficient, easy to use solution, safe for himself and the environment.
